📍 Hamburg - 22547, Germany

## Professional Experience

### DevOps Engineer Intern - Sofiatech 🌐

Tunis, Tunisia – Hybrid

Tools: ReactJS, Spring Boot, Kubernetes, Tekton, Prometheus, Loki, Keycloak, Vault, Docker, GitLab

Feb – Jun 2025

- Built Kubepilot, a unified Kubernetes management platform reducing manual effort and errors.
- Designed a drag-and-drop CI/CD builder with Tekton and React Flow, cutting setup time by 60%.
- Created a full system of observability, improving incident response time.
- Secured access with Keycloak and Vault, enforcing strong RBAC policies.

### Software Development Intern - XSUSTAIN 🌐

Tunis, Tunisia – Hybrid

Tools: ReactJS, NodeJS, ExpressJS, MongoDB, Azure, Terraform, Ansible, Docker, Kubernetes, Jenkins

Jun – Aug 2024

- Developed a full-stack restaurant management platform using the MERN stack to streamline workflows.
- Automated cloud provisioning with Terraform and Ansible, reducing setup time by 50%.
- Implemented a Jenkins CI/CD pipeline deploying containers to AKS via ACR for continuous delivery.

### Software Development Intern - Confledis SAS

Paris, France – Remote

Tools: ReactJS, Django, PostgreSQL, AWS, Docker

Aug – Oct 2023

- Enhanced a finance web app by debugging and extending features, improving reliability and retention.
- Containerized and deployed the platform on AWS EC2 with Docker, increasing uptime and scalability.

## Education

### Exchange Program in Software Engineering

Philipps-Universität, Marburg (2025 - 2026)

### Engineer's Degree in Software Engineering – Cloud Computing

Sesame University, Ariana (2022 – 2025)

### Bachelor's Degree in Software Engineering

Faculty of Sciences, Bizerte (2019 – 2022)

## Personal Projects

### Predictive Maintenance System 🌐

2025

Tools: ReactJS, Spring Boot, Python, WebSocket, MQTT, Swagger, MySQL

- Built a Python simulator generating IoT vehicle data for predictive maintenance analysis.
- Developed a full-stack app with ReactJS and Spring Boot to visualize insights in real time.

### Automated Deployment of Infrastructure and Microservices on Kubernetes 🌐

Tools: Spring Boot, Docker, Terraform, Vault, Azure, Kubernetes, Helm, Jenkins, ArgoCD, GitLab, Prometheus, Grafana

- Provisioned Azure infrastructure with Terraform, ensuring remote state consistency.
- Automated CI/CD with Jenkins, ArgoCD, and Helm, reducing deployment time by 50%.

### Insurance Agency Management (Freelance)

Tools: Angular, Node.js, Express, MySQL, WHM, CPanel

- Built an insurance management system improving workflow efficiency by 70%.
- Deployed the solution with Nginx and PM2 on a linux server for reliable uptime and maintenance.

## Skills

**Programming & Frameworks:** Java, C++, ReactJS, Angular, Spring Boot, Node.js, Express.js

**Operating Systems:** Linux (Shell Scripting)

**DevOps & CI/CD Tools:** Git, GitHub, Docker, Kubernetes, Helm, Jenkins, Terraform, ArgoCD, Prometheus, Vault

**Cloud Platforms:** Microsoft Azure, AWS

**Databases:** MySQL, PostgreSQL, MongoDB, OracleDB

## Languages

Arabic (Native), English (B2), German (A1), French (B2)
